BUNKER S

THE BEST HEADSET STAND EVER

VACUUM SUCTION PAD · **PATENTED DESIGN**

TOTALSUCTION TECHNOLOGY FOR STABILITY AND DURABILITY

BUNKER S's patented design features a special colloid suction pad that provides heretofore unsurpassed levels of steadiness even on slightly uneven surfaces.

TWO MODES TO SUIT EVERYBODY

Another advantage of the powerful adherence that the TotalSuction technology brings is that Bunker S can be used in two different modes: Standard Mode, in which it is attached to a horizontal surface, and Case Mode, in which it will attach itself to a vertical surface such as your PC case. This gives you leeway to decide how to manage your space, helping you to optimize your desktop layout.

PULL

CASE MODE

STANDARD MODE

INSTRUCTIONS
- Remove the protective membrane and clean the surface on which you plan to use COUGAR BUNKER S.
- Place COUGAR BUNKER S on the desired surface, with the suction pad facing downwards, and press the BUNKER S's base gently against it, then push the lever downwards.
- Removal: Pull the suction lever upwards. Then, grip the silicone protuberance located in the back of the bungee's suction pad and pull it upwards to remove it from the surface.

MAINTENANCE
- The suction pad has a degree of stickiness. If, after prolonged use you notice a decrease in the steadiness of the device and a weakening of its suction, please rinse it with water to clean it. When it dries, its original properties will be restored.
