

Steelpad QcK+

Professional Gaming Mousepad

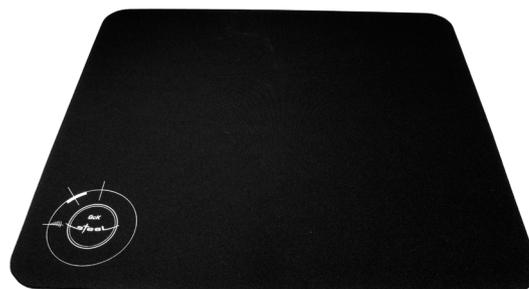

(steel series)
professional gaming gear

Product information

**(SOMETIMES
SIZE DOES
MATTER!)**

Product description

Steelpad QcK+ is the limousine of cloth mouse pads. It is a super sized mouse pad made of a high quality cloth material with a specially designed non-slip rubber base which prevents the pad from sliding; no matter what surface the mouse pad is placed on. The extreme size makes the mouse pad perfect for low sensitivity mouse settings, and the smooth cloth surface offers maximum precision. The cloth surface is also very easy on the users wrists, even for hardcore gamers, graphic designers and others who use their mouse for extended periods of time.

Special features

Amazing smooth surface. Steady rubber base. XXL sized cloth mouse pad - your mouse will never slip off!

Gaming insider notes

The Steelpad QcK line has been welcomed by games since the launch, where US Based CS Team "Team 3D" won the WCG in San Fransisco - 2004, using QcK+. This was just before it was publicly released. In July 2005, US Based CS Team "Complexity" won the ESWC (The Electronic Sports World Cup) in Paris - 4 out of 5 players used QcK+! The Steelpad QcK+ is ideal for low sensitivity mouse settings.

Team3D: "The Steelpad QcK provides a large gaming surface so we never run out of mouse pad when tracking opponents, and a unique, new, smooth surface that ensures maximum precision when aiming. Unlike other cloth pads, the Steelpad QcK is durable enough for any gamer, and won't wear and tear as easily"

Product availability date

November 2004

Part number / EAN Number

20015 / 5707119000468 / 856933001221

Package contents

Mousepad

Technical specifications
