

# Steelpad QcK

Professional Gaming Mousepad

(steel series)  
professional gaming gear

## Product information

### Product description

Steelpad QcK is soft and comfortable to the touch while the smooth cloth surface offers maximum precision. The mouse pad is made of a high quality cloth material with a specially designed non slippery rubber base which prevents the pad from sliding; no matter what surface the mouse pad is placed on. Dimensions are 12,6\*11,2 inches (320\*285mm) which fits any normal table size. The smooth cloth surface is also very easy on the users' wrists, even for hardcore gamers, graphic designers and others who use their mouse for extended periods of time. The mouse pad is compatible with all mice.

### Special features

Amazing smooth surface. Steady rubber base. Great value for the money.

### Gaming insider notes

The Steelpad QcK line has been welcomed by games since the launch, where US Based CS Team "Team 3D" won the WCG in San Francisco - 2004, using QcK+. This was just before it was publicly released. The QcK has exactly the same characteristics as the QcK+, they're just different sizes. *Team3D: "The Steelpad QcK provides a large gaming surface so we never run out of mouse pad when tracking opponents, and a unique, new, smooth surface that ensures maximum precision when aiming. Unlike other cloth pads, the Steelpad QcK is durable enough for any gamer, and won't wear and tear as easily"*

### Product availability date

November 2004

### Part number / EAN Number

20016 / 5707119000475 / 856933001238

### Package contents

Mousepad

### Technical specifications

Dimensions: 320 x 285 mm (12,6 x 11,2 in)

### System requirements

Any optical, laser or ball mouse
