HAILSTORM 240/360 LCD LIQUID CPU COOLER

Step 1

Remove the protection film / Applying thermal paste

Step 2

Secure the cooler-Intel LGA 115X/1200/1700/1851

Step 3

Secure the cooler-Intel LGA 2011

Step 4

Secure the motherboard socket. Retain the backplane

Step 5

Secure the cooler-AMD

Step 6

Please link the display to the motherboard USB 2.0 interface (Generally in the lowermost position of the motherboard, according to the direction of the interface gap can be inserted guests can check according to the motherboard manual)

Connect the 4-pin fan PWM connector to CPU\_FAN socket on the motherboard.

Connect the fan to the 5V ARGB socket on the motherboard.

Step 7

Modular Magnetic LCD Screen  
The screen can be connected separately with a TYPE-C cable to be used as a DIY secondary screen for the chassis.

\* Please note that the USB cable on the pump head and the TYPE-C cable on the screen cannot be connected at the same time to prevent damage to the screen. When connecting the screen via TYPE-C, the screen must first be removed from the pump head.

Step 8

Secure the the fans and radiator
