

MWE BRONZE 650 V3 230V

POWER EVOLVED

Cooler Master presents the MWE Bronze V3, the upgraded version of the MWE Bronze featuring ATX 3.1 support, high temperature resilience, a smart DC-to-DC + LLC circuit design, a quiet HDB fan, 80 Plus Bronze certified efficiency, an embossed cable, and a 5-year warranty.

- ATX 3.1 support
- High temperature resilience
- Quiet HDB fan
- 80 Plus Bronze certified efficiency
- Embossed cable
- 5-year warranty

ATX 3.1 SUPPORT

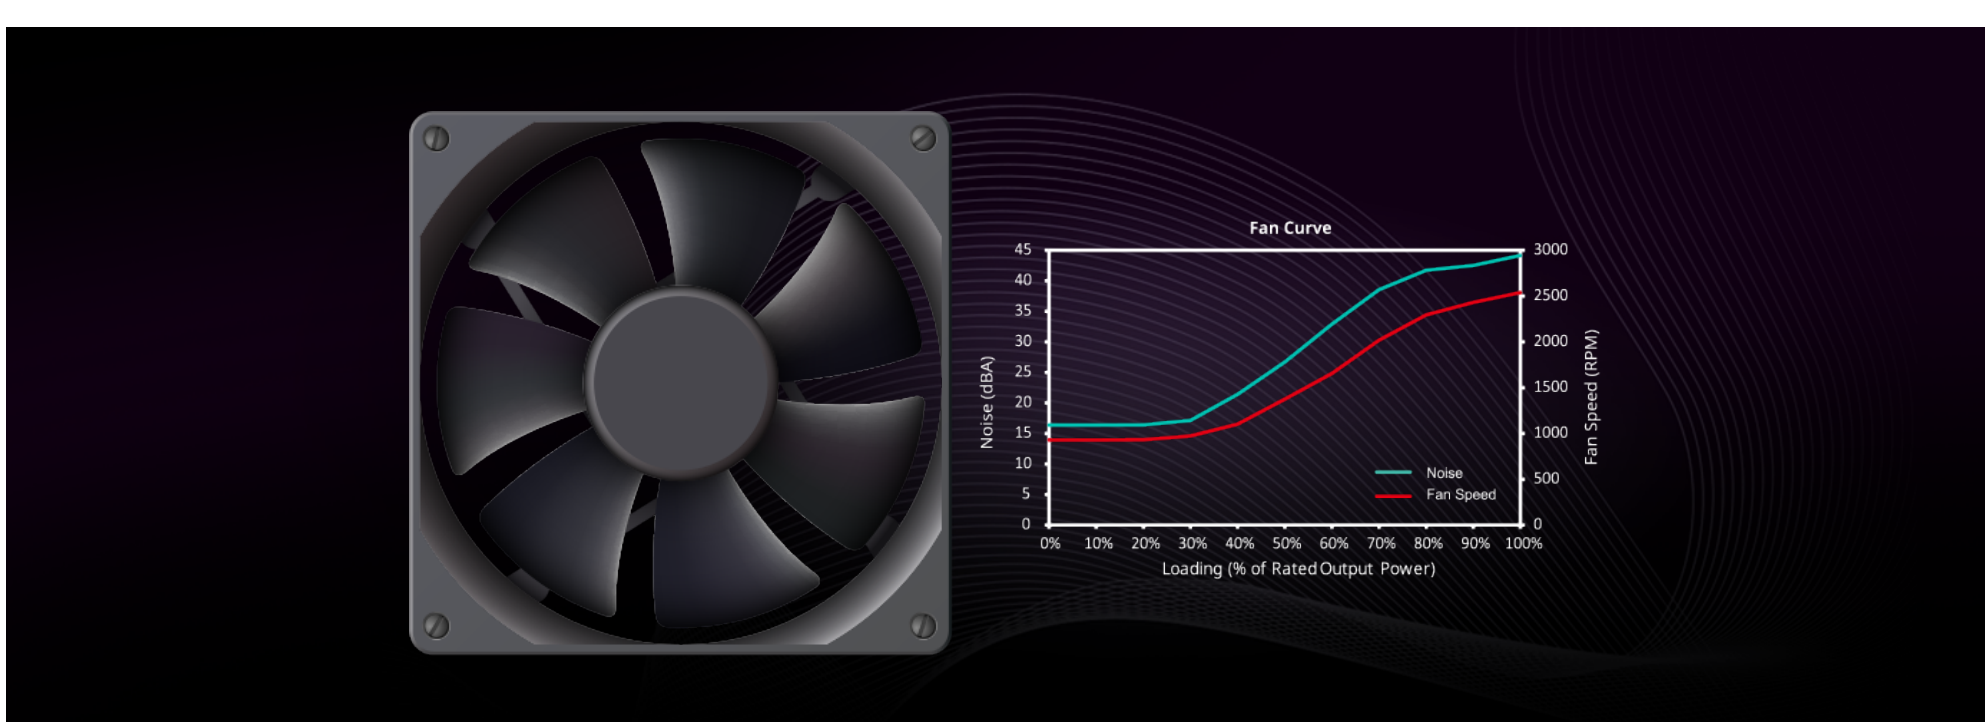

Compliant with ATX 3.1 to fully support a peak power 1.5 times higher than the rated maximum wattage, this unit is ideal for use with the 40 series GPUs.

*All performance stats confirmed in 25°C ambient temperature testing.

EMBOSSED CABLE

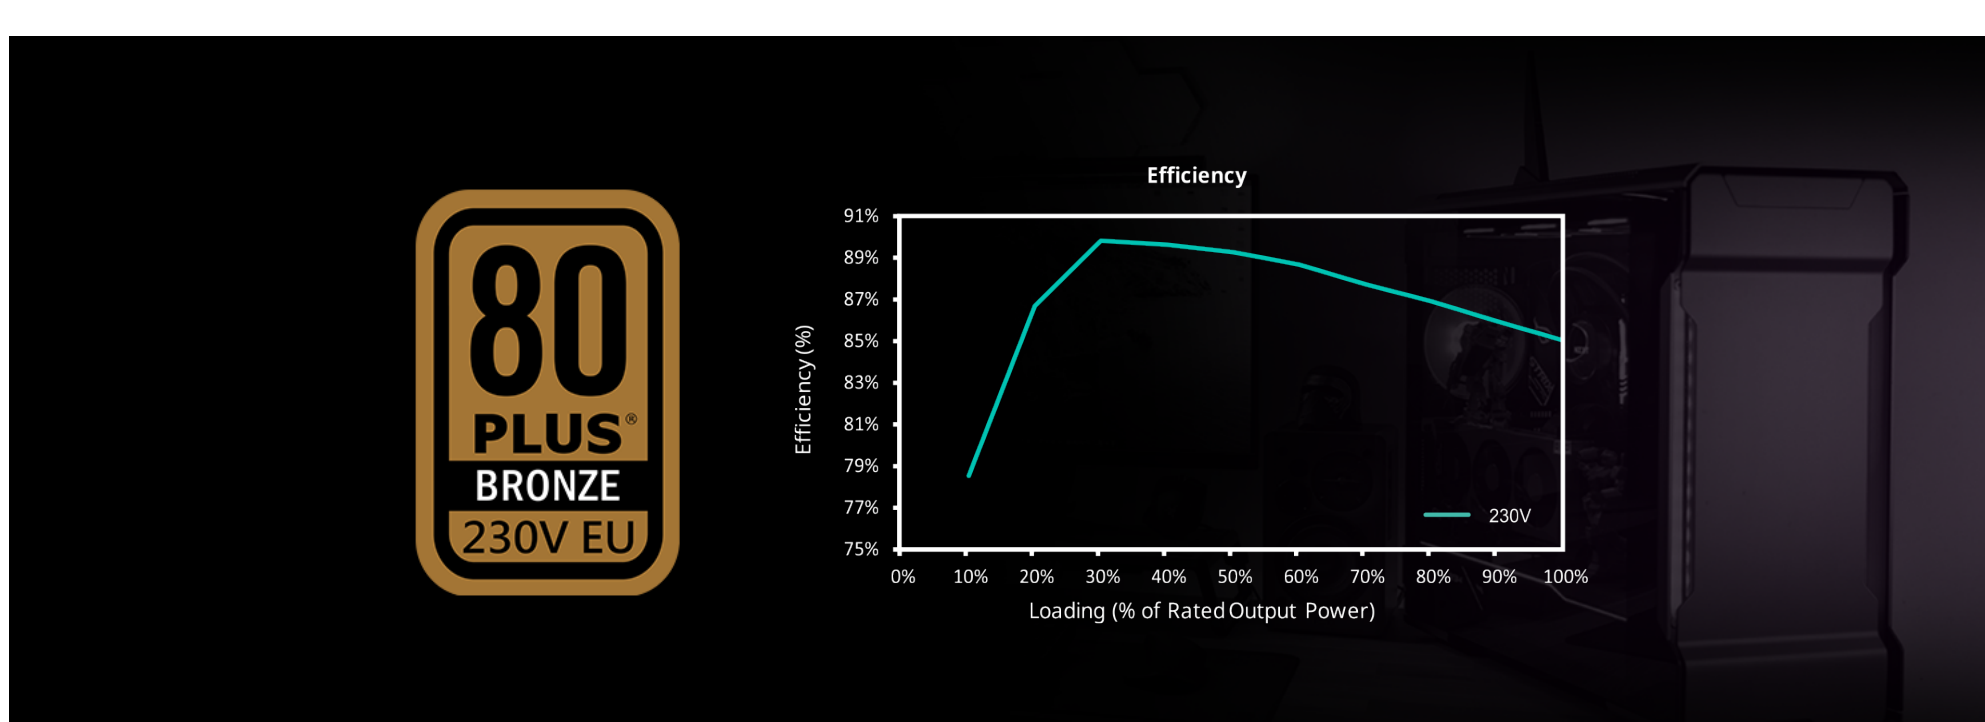

An embossed cable texture provides a softer and overall improved grip with a pleasing aesthetic.

QUIET HDB FAN

A hydrodynamic bearing fan delivers long-lasting quiet and effective cooling.

*All performance stats confirmed in 25°C ambient temperature testing.

80 PLUS BRONZE CERTIFIED EFFICIENCY

The MWE Bronze V3 is certified to achieve more than 85% efficiency at typical loads.

*All performance stats confirmed in 25°C ambient temperature testing.

HIGH TEMPERATURE RESILIENCE

A 40°C operating temperature allows for pushing your machine to the limits.

*All performance stats confirmed in 25°C ambient temperature testing.
